ACTION	YES	NO	N/A	COMMENTS
Determine the desired degree of obliteration of a roadbed prior to the Contractor beginning work on this item.				
Cross sections must be obtained prior to initiation of this work. Original cross sections for any unclassified excavation necessary to shape the roadway should be taken after the pavement has been removed.				
Review all applicable sections of the Specifications (Sections 225, 230, 250, etc.) prior to beginning this work.				
Quantities should be measured and appropriate entries made in pay record books.
